

Site Supervisor

Due to expansion PSP are seeking a suitably qualified Site Supervisor with relevant industry experience in Rail, Industrial or ESI areas.

This position reports to the Construction Manager and is normally resident at site. The role is to support the Construction Manager in managing the site and contractors (including CDM and all Health and Safety Issues). To ensure that the installation is to specification, progress is monitored, quality is assured, and work is carried out safely in accordance with applicable legislation, rules and standards.

Duties include:

- Deputise for the Construction Manager (if required).
- Supervise/assist PSP fitters and wiring staff on site.
- Ensure adherence to CDM requirements.
- Enforce and monitor health and safety compliance on site.
- Check installation in accordance with the design.
- Carry out environment, quality and health and safety checks.
- Supervise all contractors and staff on site ensuring that the relevant competencies are adhered to.
- Monitor progress against agreed programme.
- Inform the Construction Manager of resources, plant, labour and labour requirements recording them on daily diary sheets.
- Ensure that the installation is carried out in accordance with agreed method statements, Network Rail standards and legislation.
- Conduct safety inspections reporting any remedial action required.
- Report accidents / incidents in accordance with the Company procedure.
- Undertake Level A/B Duties as required.
- Undertake site surveys and asset studies as required.
- Ensure activities comply with PSP HSQE Policies, conform to contractual obligations and meet statutory HS&E regulations.
